BRIDGE REHABILITATION BEGINS ON NH ROUTE 123A IN ACWORTH
WORK ON TWO BRIDGES OVER COLD RIVER WILL REQUIRE LANE CLOSURES

The New Hampshire Department of Transportation announces work is underway in Acworth on the rehabilitation of two bridges on NH Route 123A over Cold River.

This project will require lane closures at both bridge sites, which are approximately three miles apart. Current daily lane closures will soon be followed by lane closures controlled by traffic signals.

The rehabilitation of both bridges is expected to be completed by December 2002. Associated landscaping and paving are scheduled to be completed by June 2003.

Frank W. Whitcomb Construction Corp. of Walpole, New Hampshire is the general contractor for the \$2.24 million project.
